

TOT ON LIVESTOCK (COMMUNITY RESOURCES PERSONS – CRPS)

Society for Conservation and Protection of Environment (SCOPE) invites the application from professionals, individuals & qualified master trainers in the field of Livestock management.

Livestock is the main source of high protein foods as well as a great mean of income generation for most rural population in Pakistan. SCOPE is announcing the TOT on Livestock for Community Resource Persons (CRPs).

Trainer:

Qualification – Minimum Bachelors in DVM – Veterinary Medicines & Animal Husbandry

Experience – Minimum five years as Master Trainer

Training Objectives:

- To enhance conceptual understanding of trainers role in adult learning theory and participatory training technique
- Onsite practical training of CRPs to understand Innovative, Viable & Profitable model of Livestock, which links suppliers, Successful Entrepreneurs & Product buyers.
- To develop trainees skills in designing training along with all pre –training arrangements.
- To enhance training delivery skills of the participants through practical session delivery.
- To train the CRPs in the field of Livestock

Learning Style:

The basic learning strategy for CRPs is ‘learning by Doing’. This is accomplished through lectures, tutorial, practical work and group discussion. Highly effective approaches have to use in CRPs training. Training programme keeping in mind the need participants. This programme is an excellent combination of interactive tutorial, demonstration, extensive field work led by specialized professionals and expert in livestock, exposure visits to model farms, agriculture Farms, brainstorming session and evaluation.
